SWASA™ Anti-pollution

Bothered by dust, pollution and air-borne diseases? Breathe easier with SWASA™ Anti-pollution face masks developed by E-Spin Nanotech Pvt Ltd. Featuring an innovative fibre membrane, SWASA™ face masks provide affordable and low-cost protection from all kinds of particulate contaminants down to 2.5 μm in size, including air-borne bacteria, pollen, fumes and other irritants. These masks have been tested and certified by CE mark and ISO mark to have a bacteria filtration efficiency of 99.9% as per standards. They feature a low pressure drop, making it easier to breathe through them. These masks are reusable, lightweight, comfortable, foldable and are easy to carry. They come with adjustable nose clips and a two-strap design to provide a custom fit with a secure seal that reduces the potential for eyewear fogging.

Physical properties	Testing method	SWASA
Wight (GSM)	EN12127	160
Strength in longitudinal direction (N)	EN ISO 13934-1	200
Filtration Class	EN 779	F7
Bacterial filtration efficiency (%)	ASTM F2101-14	99.9 %
Efficiency of filtration PM _{2.5} (%)	EN 779	-
Air permeability (l/m ² /s)	EN ISO 9237	300 L/M ² /S
Skin irritability	EN ISO 10993-1	NO RESPONSE
